Summary

Pursuing Master of Computer Applications (MCA) with foundational knowledge of Java, Python, and C programming. Strong interest in software development, Java programming, and problem-solving, with basic knowledge of database management and web technologies. Familiar with cloud computing fundamentals and currently exploring AWS and DevOps technologies. Eager to apply technical knowledge, learn new technologies, and contribute to developing real-world software applications.

Experience

- **AWS Cloud Intern / Industrial Trainee** May 25, 2026 – June 29, 2026
  Ingenious-TechWorld (ITW) Bhubaneswar, Odisha
  - Completed a 5-week industrial training program on AWS Cloud Computing and introductory AWS Data Engineering.
  - Gained hands-on experience with AWS infrastructure, networking, Linux administration, cloud security, and database deployment.
  - Applied cloud infrastructure and networking concepts by developing a secure two-tier AWS application as the final project.

Education

- **Silicon University** Aug. 2025 – 2027
  Master of Computer Applications (MCA), CGPA: 6.91 Bhubaneswar, Odisha
- **Fakir Mohan University** Aug. 2021 – July 2024
  B.Sc. in Physics, CGPA: 7.78 Balasore, Odisha
- **Jambeshwar Mahavidyalaya** 2019 – 2021
  Higher Secondary (CHSE), 63.79% Balasore, Odisha
- **ACBN, Sandao, Bhadrak** 2019
  Secondary (BSE), 64% Bhadrak, Odisha

Projects

- **Real-Time Weather Dashboard** Mar. 2026
  - Developed a Java desktop application to fetch and display live weather conditions for global cities
  - Integrated Tomorrow.io REST API using asynchronous HTTP networking and Gson JSON parsing
  - Built a dynamic Java Swing GUI with custom canvas painting, background image overlays, and URL input encoding
- **Secure Two-Tier AWS Application Infrastructure** Jul. 2026
  - Architected a multi-tier AWS VPC with public/private subnets, NAT Gateway, and Internet Gateway
  - Deployed PostgreSQL on EC2 inside an isolated private subnet to eliminate public exposure
  - Configured AWS Client VPN with split-tunneling for encrypted remote administration via pgAdmin
  - Resolved complex multi-layer network, security group, and socket-binding issues via Linux CLI.

Technical Skills

- **Languages:** Python, Java, C, HTML, CSS.
- **Cloud:** AWS, Git/GitHub.
- **Databases:** Oracle SQL, MySQL,PostgreSQL.

Certifications

- AWS Masters Intro to AWS Data Engineering – Ingenious-Tech World
